Are You 100% Sure?

This is how we introduced ourselves to the JUNCTION ASIA 2022 Participants.

But are you 100% sure that these information are true?

It may be a concrete truth.

But can you prove it?

Can you prove the credibility of 300 participants?

Would you believe what they are saying rather than doubting?

Employers are going through this process every recruiting season.

Junhyung Park 2022.08.05.

Hello, everyone! My name is Junhyung Park, and I am from the United States. I am an innovator, rocketeer, researcher, and amateur ultimate frisbee player. I always work from a wide spectrum of areas by taking active roles in different projects. I am looking for a team to work with!

1. What is your position? [Developer/Entrepreneur/Designers]
 - Developer! I am learning to become an entrepreneur as well.
2. What is your motivation for joining Junction Asia 2022?
 - Learn how other innovators design and develop solutions to problems.
 - Real-life applications of my skills and knowledge.

3. What skills do you have?
 - Various coding languages: Python, JavaScript, Java, C++, etc.
 - ReactJS, Angular, Vue.js
 - Hardware development: Arduino, Raspberry Pi, etc.
 - Database (PostgreSQL, MySQL, etc.)

4. What kind of software do you use?
 - An interface for a web application.
 - I am interested in AI/ML.
5. Please let us know your background.
 - Cleveland Give Foundation: Educational engagement.
 - Case Western Reserve University: Research on eliminating power consumption in sensors.

- USAFA Falcon 1: Research on autonomous flight control.
- 2022 NASA Student Launch Competition: Designed rocket payload architecture, collected sensor data, estimating the landing position, and transmitting the estimation to the ground station.
- SUP SAT: Researched Long Range (LoRa) Radio Transmission System's performance for potentially making weather balloon research cheaper.
- DHT Machine: Controlled the status of the dehumidifier based on the humidity.

Resume fraud cases in US

North Koreans Steal LinkedIn Resumes in Crypto Job Search Scam

■ Scammers are pilfering language from LinkedIn and Indeed

North Korean Hackers Flood the Crypto Job Market With Plagiarized Resumes

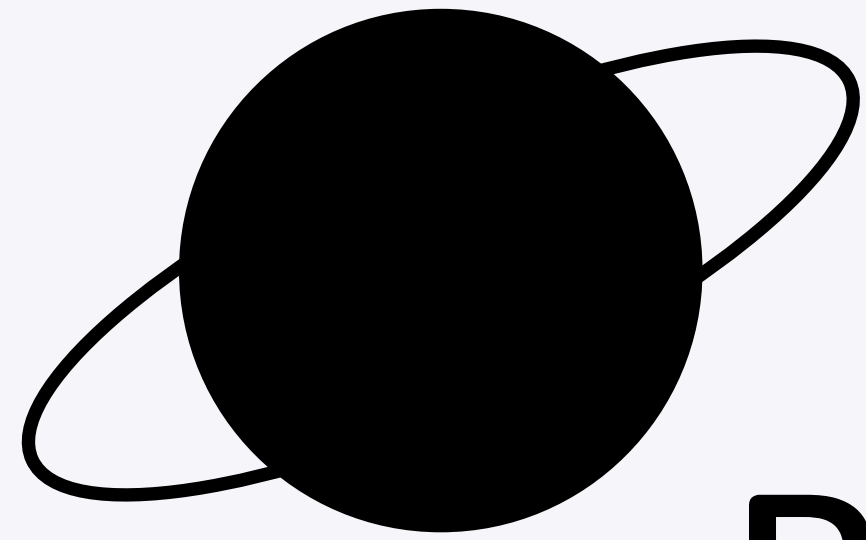

Author: Jordan Lyanchev • Last Updated Aug 2, 2022 @ 08:15

North Korean hackers have found a new way to exploit the cryptocurrency market, and it's snickier than before.

Job Application Process

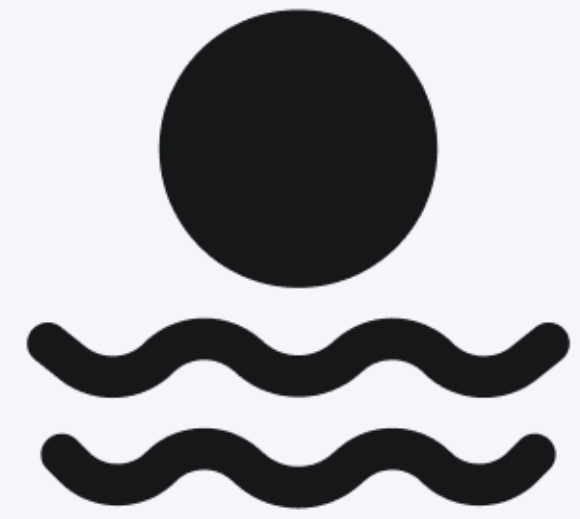

In Korean job market, workers must submit their employment insurance subscription details directly, and can check documents such as health insurance gains and losses and employment insurance subscription history. Information inquiry and authenticity determination in every certification and since one applicant has a number of them, it takes a lot of manpower and time. For large corporations or public corporations this is a big economic loss and for smaller companies, there's difficulty in knowing the authenticity of many people in that small number of people (5) are responsible for a large number of people (1000). This increases the possibility that exposure fake resumes.
